The file size of a recorded movie is limited to approximately 2GB. Recording automatically ends when the file size limit is reached.

DSC-T50 Battery Charts

* Battery life and number of images that can be recorded/viewed

Tables show the approximate number of images that can be recorded/viewed and the battery life when shooting images in [Normal] mode with the supplied battery pack at full capacity and at an ambient temperature of 25°C (77°F). Actual numbers may be less than those indicated depending on the conditions of use..

Shooting Still Images

-CIPA

Memory Stick® media		
LCD Screen	No. of Images	Battery Life (min.)
On	Approx. 400	Approx. 200

Image quality "FINE". The LCD screen is turned on. Shooting once every 30 seconds. The zoom is switched alternately between the W and T ends. The flash strobos once every two times. The power turns on and off once every ten times.

Viewing Still Images

No. of Images	Battery Life (min.)
Approx. 7000	Approx. 350

Viewing single images in order at three second intervals (approx.).

Shooting Movies

LCD Screen On (min.)
Approx. 180

Shooting movies continuously with an image size of [160].

* The maximum number of continuous shots

Size\Quality	Fine	Standard
7M	5	8
7M 3:2	5	8
5M	6	11
3M	9	17
16:9	15	27
2M	15	27
VGA	85	100

When the battery level is low or when the internal memory or Memory Stick Duo media is full, the burst stops. Images may not be captured in Burst mode depending on Scene mode used.
